

TAPER GRID COUPLINGS TYPE RGTV

TYPE RGTV

- Vertical split cover: Ideal for higher running speeds and general purpose applications.
- Lubrication fittings: One or more lube holes in each half cover makes for easier lubrication. Fill through one and remove other plug for venting.
- Seals: Durable synthetic material prevents loss of lubricant & entrance of water, dust or other foreign materials.
- Hubs: Made of steel for maximum strength.
- Taper Grid: Made of high strength steel, quenched and tempered to spring hardness.

TAPER GRID COUPLINGS TYPE RGTH

TYPE RGTH

Features

- Torsionally Flexible.
- Vibration dampening - reduced peak / shock loads.
- Accommodates angular, parallel & axial misalignments.
- Low operating cost.
- Smooth & quiet operation.
- Low & easy maintenance.
- Overload conditions cause the grid element to shear, like a mechanical fuse.
- Quick & easy installation.

Lubrication:

For quality lubrication to get good performance and long life, Rathi Special Grease (RSG) is highly recommended.
